POLICE PUZZLED BY COMMERCIAL CLUB CASE REPORTED FROM ARIZONA

Boy With More than 300
Pennies and Much Jewelry
Says He Robbed Houses
Here. No Thefts Known.

City and county authorities are puzzled over a case reported to Chief of Police McMillin today by Special Agent Clawson, of the Santa Fe force from Winslow, Ariz. Clawson has a prisoner, described as "a boy" who is said to have confessed to robbing two houses in this city, and on whom was found a lot of swag. The city authorities hadn't heard of any burglaries the prisoner is likely to have been connected with and neither has the sheriff's office.

Clawson sent two telegrams to the chief. The first said he had a boy who had in his possession more than 300 pennies, Elk badges, watches, rings, old coins, and that these were carried in a First National bank sack. The second telegram was to the effect that the boy had confessed that he robbed two houses in Albuquerque.

Chief McMillin instituted inquiries at once to learn where the confessed thief had operated here. He could find no clue to the despoiled places. The Penney store management brought a big shipment of pennies to town to equip themselves for fractional prices a week or two ago, but the management told the chief that as far as they could tell—and they were pretty sure they could—not a single penny was missing from their big pile. Where the thief got 300 or more pennies here the chief couldn't imagine, unless he ran across a child's bank somewhere. Thiefs of that sort, however, are usually the first to be reported by the indignant family.

Chief McMillin turned the telegrams over to the sheriff's office, and Sheriff Romero instructed Undersheriff Dick Lewis to dispatch a man to Winslow for the prisoner.

Urbano Sanchez and Jose Maria Martinez were found guilty last night of robbing William H. Lawrence, who was held up in the Belen district several months ago. Ramon Salazar, tried with them, was acquitted.

Urbano Sanchez is an old offender, and regarded as a habitual and incorrigible criminal by the authorities. He is likely to draw a severe sentence.

Board of Directors Endorses
Proposition for Local Stock
Sales Which May Bring
Plant Here.

**BELIEVE IN ECONOMIC
MERIT OF THE BOXES**
Plant Proposed by Promoters
Will Have Capacity of 2,000
Boxes a Month and Employ
Fifty or More Men.

With the sanction and written approval of the board of directors of the Albuquerque Commercial club, officers and promoters of the Arctic Iceside Refrigerator company are to initiate a stock selling campaign in this city, which if successful will result in the location of a factory here for the manufacture of the refrigerating machines, with a capacity of 2,000 machines a month, and a working force at the start of 500 men.

The lessor refrigerator, which it is proposed to manufacture here, is a combination of the paverons and device patented of George E. Cox, a well known mechanical engineer who is the controlling owner of the parent corporation behind the manufacturing plant and who is now in Albuquerque with C. W. Bray and V. S. Hills of Deming, local agents of the company who will have charge of the stock selling campaign. W. D. Murray of Silver City, president of the Silver City National bank, is president of the company and other well-known business men of the southern part of the state are stockholders and members of the first board of directors.

The company is incorporated under the laws of New Mexico for \$1,000,000, and the stock will be sold at par value of \$1. It is proposed by the promoters to sell from \$15,000 to \$29,000 worth of 10% stock here, such a sale guaranteeing the location of the factory. They ask no bonus or factory site and express confidence in their ability to sell the stock here on its merits as a demonstrated investment proposition.

The lesser refrigeration device which is the basis of the proposed product, was shown during the state fair where it attracted a great deal of attention. It is now on exhibit at the company's Albuquerque office over the Woolworth store. It is a proposition which at once recommends itself to all those removed from a ready and cheap supply and its sale would be large in Albuquerque's trade territory. In fact the promoters regard this city as the most favorable factory location and distributing point in the southwest.

The club directors, after an investigation, have issued the following statement regarding the refrigerator and the proposal of the company to locate the plant here:

Resolution.
Whereas the Arctic Refrigerator company, a corporation of the state of New Mexico, is the owner of patents covering refrigerators and other
